

France has recovered HPAI-free status since December 15, 2024

No outbreak in poultry has been recorded since November 14, 2024. All restrictive measures were lifted for the entire national territory of France on December 15, 2024. France is free of HPAI according to the European union regulation and to the provisions of the World Organization for Animal Health (WOAH) since December 15, 2024 (Article 10.4.6 of the Terrestrial animal health Code).

Thus, in accordance with chapter 1.1 of the Terrestrial Animals Health Code (Code), WOAH accepted the closure, on its official WAHIS website, on December 16, 2024 of [event no. 5810](#) started on 08/12/2024.
